Improving Enterprise Data Resilience

Data Resiliency Maturity Model

The Dimensions of Data Resilience

Data Resiliency Maturity Model

Resilience is always a Shared Responsibility

And you are always responsible for **your data**

Cloud Provider Responsibility	Physical Infrastructure	Virtual Infrastructure	Operating System	Network Controls	Applications	Identity & Access	Data
	SaaS					✓	✓
	PaaS			✓	✓	✓	✓
	IaaS		✓	✓	✓	✓	✓
	On-Prem	✓	✓	✓	✓	✓	✓

YOUR Responsibility to Protect Microsoft 365 + Entra ID

Surge in
Cyber Threats

600M

identity-based
attacks every day.

Increased usage

2B

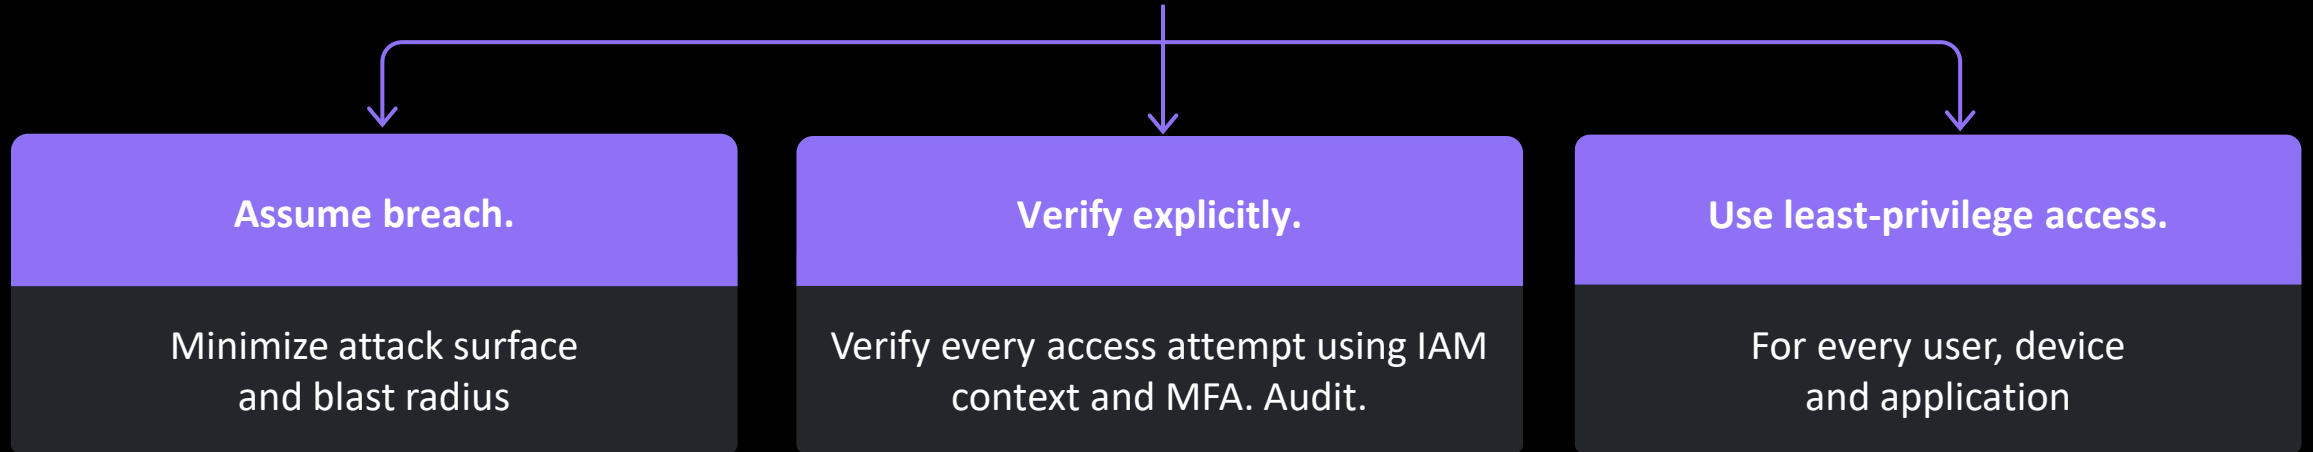

new Microsoft 365
files added every day.

Identity at risk

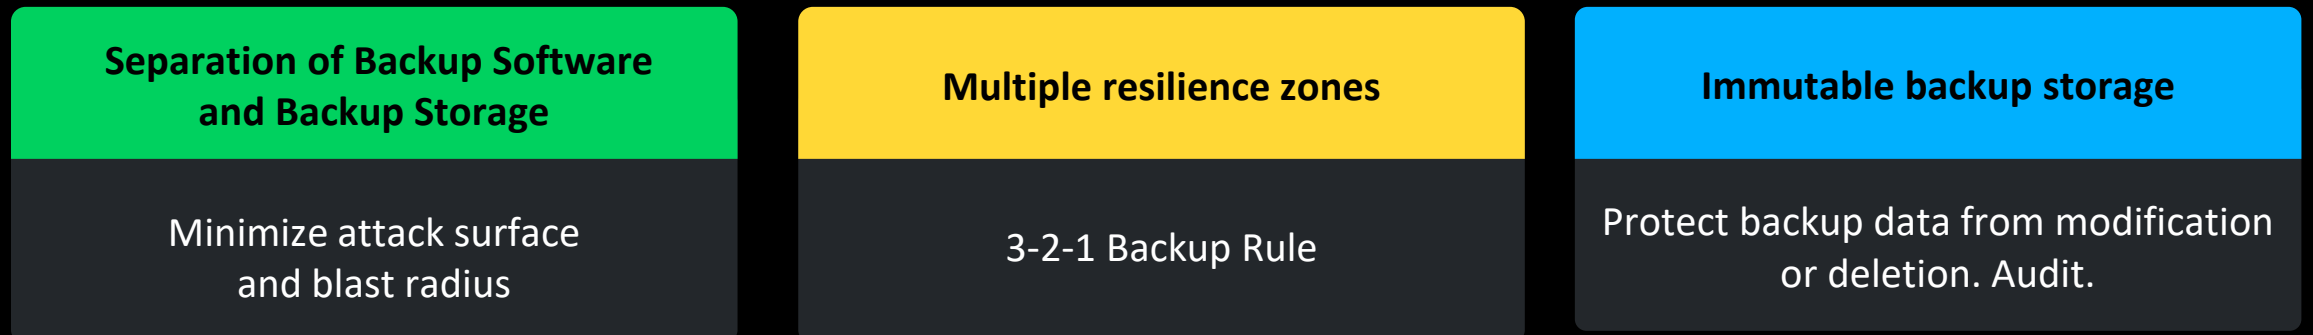

30%

Of breaches are due
to compromised
identities.

Zero Trust Principles

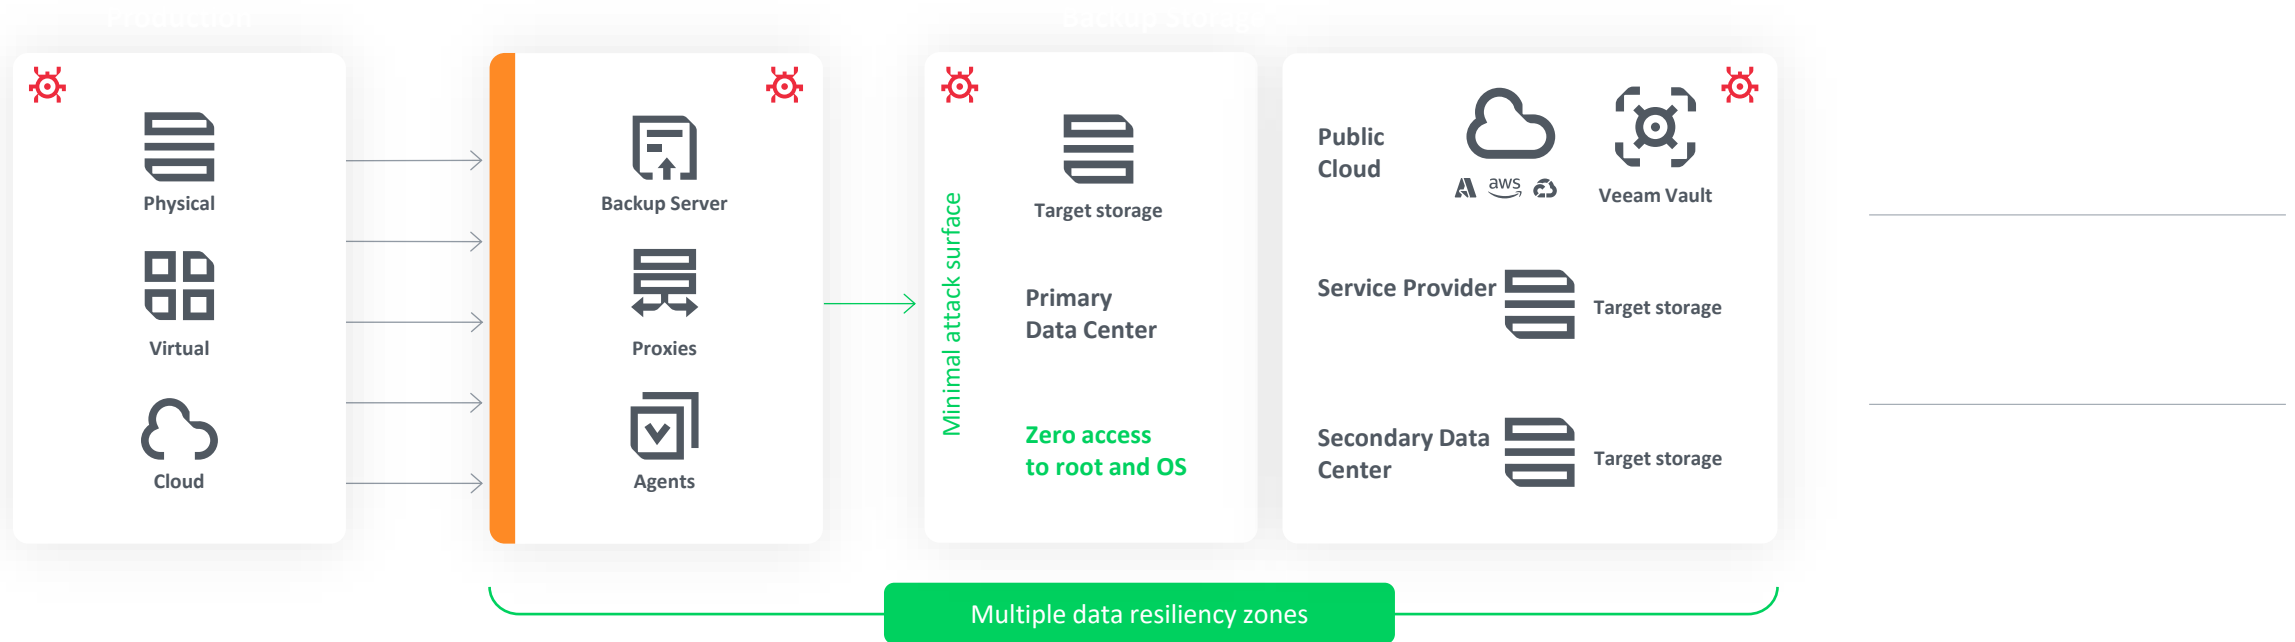

Extending Zero Trust Principles to Data Resilience

Hardware-agnostic security with Zero Trust Data Resilience

Secure by design with Zero Trust Architecture

The Veeam logo is centered in the upper half of the image. It features the word "veeam" in a white, lowercase, sans-serif font. The text is contained within a white-outlined rectangular box with rounded corners and clipped corners on the left and right sides. Behind the box, there are two large, semi-transparent, light green geometric shapes that resemble stylized mountain peaks or abstract letterforms.
